Databases: MySQL
Tools: Git, GitHub, Jira, Trello, Figma
Methodologies: Agile, Scrum
Additional Skills: C Programming Language

Projects

YouCode Arena — Hackathon

Centralized web platform designed to professionalize competition management on campus (e-sports, programming challenges, sports competitions). It allows administrators and organizers to create tournaments, manage participants, and generate visual competition brackets.

Workspace Staff Manager

Design of a visual tool for allocating employees on a floor plan. Lifecycle management (CRUD), interactive drag-and-drop functionality, local data storage, and multi-device UI/UX optimization.

Technologies: JavaScript, Flexbox/Grid, Bootstrap, LocalStorage

StruoCV – Professional CV Generator

Development of a CV creation application with a multi-step form (Stepper). Implementation of dynamic fields for experience and skills, real-time data validation, and an interactive progress bar.

Technologies: JavaScript (Native DOM), Tailwind CSS, HTML5, Git

JobConnect – Interactive Recruitment Dashboard

Design of a dynamic interface for managing job offers and user profiles. Creation of a persistent favorites system, interactive modal forms, and a responsive dashboard with DOM updates without page reload.

Technologies: JavaScript ES6, Modern CSS3 Layouts, LocalStorage API, Git

Soft Skills

Teamwork	Leadership
Critical Thinking	Autonomous
